RUGS COLLECTION

ECONYL[®]
ENDLESS POSSIBILITIES

A circular inset image showing several spools of light-colored thread on a vibrant, multi-colored geometric rug. The rug features bold stripes and triangles in shades of purple, yellow, red, and grey. The spools are arranged in a cluster, with some showing their colorful plastic bobbins (blue and orange).

ABOUT Surface Ideas

Based in Miami (FL), Surface Ideas is a distribution company which specializes in contemporary and highly-designed Brazilian rugs and furniture. Our range is available through resellers in the US and Caribbean, as well as online.

A circular inset image showing a close-up of a person's hands using a pair of scissors to trim a rug. The rug has a vibrant, multi-colored geometric pattern with sections of orange, brown, blue, and green. The background is a plain, light-colored surface.

ABOUT Punto e Filo Rugs

Punto e Filo has been creating high-end, individually-designed Brazilian rugs since 1930. With the ability to customize and produce exclusive products using the finest raw materials, Punto e Filo is synonymous with excellence in creative interior design. It has over 30 stores in Brazil and their rugs are now available at Surface Ideas.

MAIN
Features

HIGH-TECH YARNS

Econyl® is the most technologically advanced synthetic yarn developed specifically for the production of rugs. Extremely durable yet completely washable, Econyl is an ultra-smooth nylon fiber with a texture similar to that of natural fibers such as silk. It creates rugs don't only look and feel good but which are also **non-allergenic, anti-static, water resistant and fire retardant.**

HANDMADE RUGS

Punto e Filo rugs are handmade by Brazilian artisans with three generations of experience in the craft. Our rugs all receive individual attention to detail that no machine can match. Every rug is unique and carries with it the love and personal devotion to excellence only our team can provide.

STATE OF THE ART DESIGNS

A globally recognised and award-winning team of designers are responsible for creating more than thousand unique designs exclusively for Punto e Filo. **Alfredo Barbosa de Oliveira, Antonio Ferreira Jr., Rodrigo Ohtake, Zanini de Zanine, LATTOG Studio, Giorgio Bonaguro e Alessandra Delgado** who has joined the team more recently, have developed timeless and strikingly unique designs.

A close-up, slightly blurred photograph of a rug being woven on a loom. The threads are in shades of red, yellow, and white. The text 'MAIN Features' is overlaid on the left side of the image.

MAIN Features

100% CUSTOMIZABLE DESIGNS

Every Punto e Filo rug can be personally customized by its owner. Not only is the shape of the rug in your hands, but so too is the size, colour, pattern and markings. A Punto e Filo rug can be your very own piece of art. All that's stopping you is your imagination.

ECO FRIENDLY REGENERABLE MATERIALS

We only get one planet and when it comes to looking after it Punto e Filo walk the talk. Our rugs are all handmade with Econyl, a regenerated yarn made from reclaimed nylon such as discarded fishing nets, fabric scraps and carpets destined for landfill. Through a radical regeneration and purification process, the nylon waste is recycled back into its original form as virgin nylon. While our unique product means we're part of the global waste solution, we're also doing plenty to help mitigate climate change. Econyl reduces the global warming impact of nylon, compared conventional nylon made from oil.

THE TOMIE OHTAKE'S TAPESTRY

In November of 2013, a terrible fire destroyed the Simon Bolivar Auditorium at Memorial da América Latina in São Paulo, Brazil. After four years, the São Paulo State government started to rebuild the Auditorium and Punto e Filo decided to face an unthinkable challenge: recreate the famous tapestry of Tomie Ohtake consumed by the fire. But only to reconstruct the 9,041.68 ft² tapestry wasn't enough for us, it has to be made in a single piece! Marinho Pisaneschi, sales director of Punto e Filo and the third generation ahead the company justifies; "Simply because it will be more beautiful".

With the endorsement of the Instituto Tomie Ohtake, the tapestry was then handwoven by more than 50 artisans over 200 days of hard work. The piece weighs more than 4 tons and is now hung on its original spot. It has 167.32 x 41 ft, consisting in total of 9,041.68 ft² by the cost of around US\$ 1.000.000,00 and was donated from Punto e Filo to São Paulo State in December of 2017.
